

FeatureScript Standard Library

This document contains the FeatureScript source code to all Onshape features and utility functions. It is provided as a learning aid, an example, and a starting point for your own custom features.

You can browse the individual tabs or use the magnifying glass at the top to search the library. For an introduction to FeatureScript, see the [website](#). To learn to write FeatureScript, visit the [documentation page](#). The library code is documented with special comments, which have been processed to create a [comprehensive reference](#).

The library is provided under the MIT license, as detailed in the LICENSE tab.
